Technical Knowledge:

- JavaScript, HTML, CSS, CI/CD Build Validation, System & Application Troubleshooting

PROFESSIONAL EXPERIENCE

Software Quality Assurance Engineer

2023 - 2026

Forty Degrees Celsius Inc. | Cebu, Philippines

- Conduct manual testing for a cross-platform web and mobile application to ensure functionality, usability, and stability.
- Create, maintain, and execute test cases based on business and technical requirements.
- Perform regression, exploratory, and cross-platform testing to identify critical defects before release.
- Log, track, and validate defects in Jira, ensuring proper defect lifecycle management and resolution.
- Support CI/CD pipeline validation by testing builds and verifying release readiness.
- Prepare QA documentation including test reports, defect summaries, and quality metrics for release decisions.

Technical Support / System Administrator

2022 - 2023

Alliance Software Inc. | Cebu, Philippines

- Provided technical support and troubleshooting for POS systems, resolving software and hardware issues.
- Assisted with system installation, configuration, and end-user onboarding.
- Performed monitoring and maintenance tasks using Zabbix and PuTTY to ensure service availability.
- Conducted performance checks and ensured stable server/network operations.
- Escalated and resolved issues efficiently to improve customer satisfaction and operational continuity.
